PROJECT DESCRIPTION: "Food, Heritage and Culture Festival" is a programme that encompasses history, tradition, customs, arts and the heritage of Sabah through a pantomime, traditional performing arts edutainment around a full-sized live hearth, followed by a festival featuring the traditional practice of cooking "Food over Fire" at the historical venue as the primary public space. Our satellite programme space, the historical New House situated directly across the XX river, is an arts & craft night market free for the public would run over 10 days, featuring an exhibition, cultural workshops & classes, and presentations of folklore, myths and legends around a secondary full-sized live hearth.

PROBLEM STATEMENT: It is around the hearth that families congregate to sing, dance, cook and share stories in their daily lives and during traditional festivals, feasts, rituals, births and deaths. The hearth represents more than just a kitchen. It keeps alive traditions and the meaning behind them. Traditional dances, chants, costumes, legends (traditionally passed down through oral history), tribal customs and craftsmanship of instruments have lost their original purpose and meaning, and today, are often seen from a touristic point of view. Traditional performances without the understanding of its history will see the diminishing value of preserving and conserving tribal performing arts, the profession of the practitioners and eventual loss of cultural identity.

NEEDS ASSESSMENT: Restore the meaning and purpose of traditional performances not only for entertainment but as an educational tool. The impactful and powerful image of a full size live hearth represents the traditional lifestyle of Sabah's indigenous groups. Through it, "Food, Heritage and Culture Festival" can showcase meaningful performing arts, the practitioners, community engagement and public participation of the "Food, Heritage and Culture Festival".

DATA SOURCE: The subject of the importance of the hearth was brought to the floor at the recent DUN in May 24, 2022 where it was stressed "that Adat, both legal and social rules, act as a force for social cohesion which bind members of every community together and plays a very important role in social engineering and governance of the native communities. Despite all that, progress and modernity have brought about social and cultural changes to the native communities and to a certain extent diminishes the relevance of some Adat and tradition.

: Perpetuating the traditional culture of the performing arts through an innovative manner will generate a diminishing interests among our youth and the general public. It will secure a better professional future and bring to light the importance of preserving and conserving of our traditions. With a better public understanding of its meaning and purpose, reverence of the respective professions can be reinstalled and monetary values improved. Because of the newly constructed bridge across the river, the livelihood of the river boatmen, iconic to Sabah's culture is slowly fading. Putting the sampans back on the river gives life to the river.
